
uniform
uniform $(1-e)^n$, $e = 0.01$
two-rate, $k = \lceil 3 \ln n \rceil$ (power law)
two-rate, $k = \lceil \sqrt{n} \rceil$ (stretched exponential)
two-rate, $k = \min(\lceil \sqrt{n} \rceil, 20)$ (saturating)
saturating
$k \sim \ln n$
$k \sim \sqrt{n}$
$P$(correct)
